■ Basic Support Exploitation

● Direct Support Exploitation

1 DOD provides cover data coverage plots of all reconnaissance imagery for the intelligence community. NPIC and other US organizations will produce special products for internal use by the imagery interpreters in operating targets during first and second phase reporting.

2 Overseers first phase exploitation as directed by higher authority.

3 Refers to the permissive support required by the NSA and other USIB member agencies and committees. Basic Support Exploitation on communications, electronic radar facilities which are associated with each of the areas of imagery interpretation related to military capabilities will be accomplished by the organization assigned specific responsibility for Basic Support Exploitation in that area.

4 Basic Support Exploitation of Scientific and Technical facilities will at times entail examination and comparative reporting of comparable deployed facilities. Basic Support Exploitation of weapons and weapons systems will at times entail examination and comparative reporting of associated deployed facilities and missile ranges.

5 NPIC will not engage in Direct Support Exploitation as such. However, NPIC will respond to the approved requirements of USIB member agencies and committees and to other higher authority in all functional areas of imagery interpretation.
